

# FLEXICIENCY

energy services demonstrations of demand response, FLEXibility and energy effICIENCY based on metering data

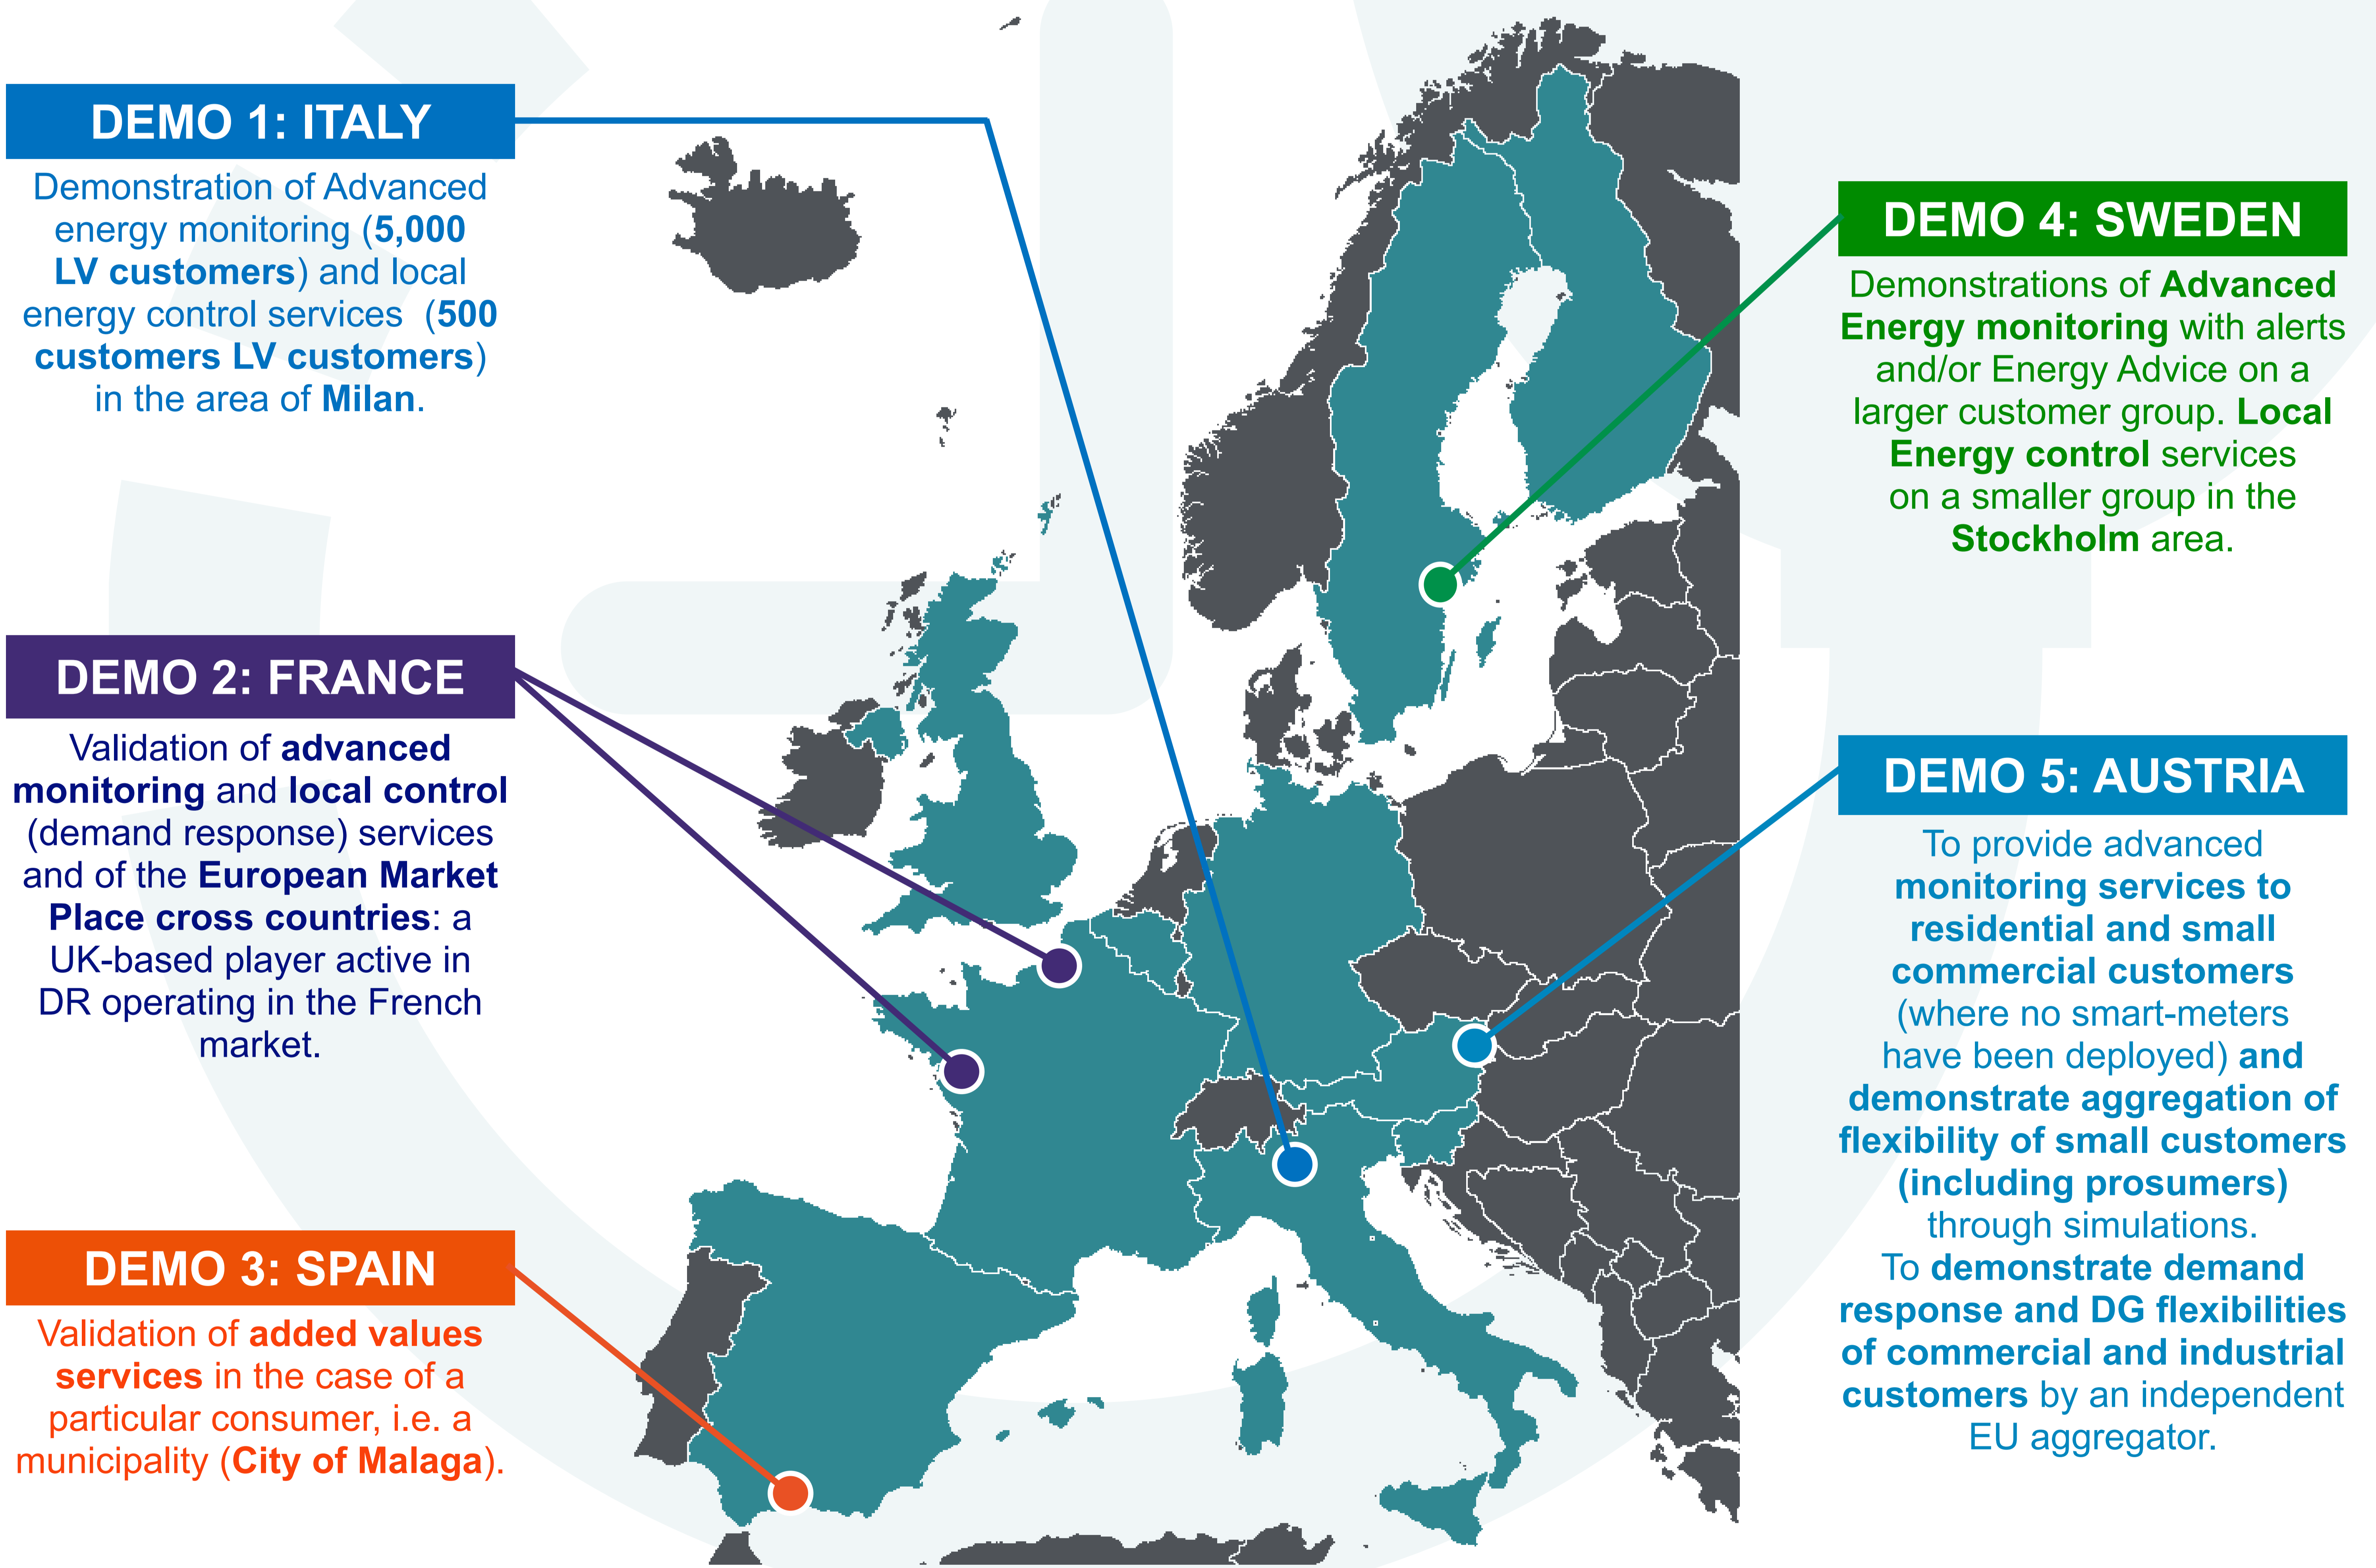

## Overall Objective

To demonstrate that the deployment of novel services in the electricity retail markets can be accelerated thanks to an open EU Market Place for standardised interactions among all the electricity stakeholders, opening up the energy market also to new players at EU level.

- 1** Accessibility of smart meter data made available by DSOs in "real-time" to all actors
- 2** Development of a standardized environment and APIs for services and data exchange at EU level
- 3** Recommendation for Regulators and Policy makers towards efficient energy markets

## Demonstrations

## 18 Partners in 10 EU countries
